

Now you can apply CT Summation CaseVault Services' dedicated support teams and award winning services to your next matter to ensure victory.

CLIENT SERVICES

We provide 24/7/365 project management and technical support from initial case consulting through project completion. CaseVault Services provide clients with a unique full service approach to managing your case.

LITIGATION SUPPORT CONSULTING

Our expert services staff can help you structure your case, including discovery and supporting document data, so that you can intuitively access evidence quickly and conduct complex searches easily. When your legal team is free to work efficiently and effectively, you are free to develop a winning case.

ESI FORENSIC COLLECTIONS

Data collections require a forensically sound process for imaging computer hard drives and other electronic media. We partner with collections specialists who can recover electronically stored information (ESI) from a variety of media including hard drives, zip disks, tapes, floppy diskettes, PDAs, CDs and DVDs, USB, IM and other removable drives, digital cameras and recorders, flash cards, network servers, BlackBerrys, Palm Pilots and cell phones.

ESI PROCESSING

We offer state of the industry ESI Processing services. Our consultative approach allows us to reduce costs at the onset of projects. These services include password cracking, de-duplication, data filtering, text extraction, data loading and time zone normalization. CaseVault Services can deliver production data in TIFF images, PDF files, extracted text files, metadata and or native files.

REPORTING

We deliver accurate and timely information to enable clients to control data during their electronic discovery projects. CaseVault Services can provide clients with reports that track and account for all record activity. We deliver strict chain of custody and quality control processes and provide an audit trail that can be produced to the courts with confidence.

TECHNOLOGY MANAGEMENT

No other hosting service offers our level of product support. Our experienced support services team acts as your dedicated technical project management resource, guiding you through each phase of your case from beginning to end. With CaseVault Services managing the technology, you will be able to efficiently and effectively manage the process of discovery, access key evidence, manage case sensitive documents and more with 24/7/365 access.

CT Summation delivers peace of mind to our clients by minimizing risk and ensuring data integrity. We have a variety of service offerings to suit all electronic discovery needs. CT Summation helps clients win!
