- CaseVault Services
- CaseVantage
- Discovery Cracker
- Trident Pro

A BOLD STATEMENT

CT Summation has the products and solutions you need to prepare and win your next case. For over 20 years, CT Summation has been dedicated to providing solutions for legal professionals to gain the advantage in their cases by leveraging technology.

NO TWO CASES ARE IDENTICAL

We know that no two cases are the same. With CT Summation, you can choose from a range of Litigation Support Software and Services. We provide the best solution for legal evidence and document workflow - whether you're concerned about control and security or need easy access and multiple party support.

RELIABILITY AND SPEED

Combining the reliability and speed of our applications with our expert support and international network of resellers, trainers, and hosting partners, you can concentrate on what you do best – practicing law and winning cases.

iBLAZE

iBlaze is CT Summation's flagship product. Award-winning iBlaze provides attorneys and their staff with an end-to-end litigation solution from discovery to trial preparation, including tools to load and review documents, create production sets and manage transcripts. Our unique portability allows you to work where you need to and share case information across your team. Extend case accessibility using the additional advantage of web deployment through WebBlaze's internet-based review platform.

ENTERPRISE

CT Summation Enterprise leverages the award-winning technology and time-tested functionality of CT Summation iBlaze and WebBlaze combined with the power of a Microsoft® SQL Server database. Enterprise combines robust desktop functionality with the flexibility of browser access in a single integrated solution.

CASEVAULT SERVICES

Ideal for multi-party, multi-district litigation or those interested in a hosting service for their case data, CT Summation CaseVault lets you collaborate using a secure, neutral Web site. CaseVault hosted services include online review, electronic document discovery processing, document management, production, and project management services for the duration of your case. CaseVault's award-winning services let you concentrate on your case, not technology. CaseVault is powered by CT Summation CaseVantage.

CASEVANTAGE

CT Summation CaseVantage is your comprehensive solution for online discovery hosting. From analysis and review to production, count on CT Summation CaseVantage to help you work smarter. CaseVantage is a 100% web based application that can be hosted or installed on your own web servers. Documents in any language can be reviewed since CaseVantage supports Unicode.

DISCOVERY CRACKER

CT Summation Discovery Cracker is the premier in-house eDiscovery processing solution available today. Comprised of forward-thinking technology and preeminent product support, Discovery Cracker is proven across a wide spectrum of EDD environments. Designed to reliably extract and efficiently process terabytes of e-files and emails in over 500 file formats, it is highly scalable and flexible to address a processing need of any size. Now with Unicode, Discovery Cracker recognizes over 300 languages and exports data seamlessly to iBlaze, Enterprise and CaseVault for review.
