

## We take care of the technology so you can focus on what you do best: winning your case.

CT Summation CaseVantage is your comprehensive solution for online discovery hosting. From analysis and review to production and offline integration, count on CT Summation CaseVantage to help you work smarter.

### P.R.E.P. YOUR CASE

CT Summation's award-winning solutions provide the support you need for today's complex legal matters. From **P**rocessing, to **R**eview and **E**valuation, to the rolling **P**roduction of document sets, our solutions will assist you to P.R.E.P. your case for deliberation, settlement or trial.

### LITIGATION MANAGEMENT

CT Summation CaseVantage's powerful SQL back-end supports litigation containing eDiscovery and millions of documents—no matter how large or dispersed your review team.

### CASE EXPLORER

Navigate your entire case, data and work product using a flexible set of expandable folders. You can define any number of folders, categories and issues to organize your case in a way that makes sense to you and your review team.

### INTEGRATED SEARCHING

Search your entire case, including documents, OCR, transcripts, e-mail, production sets, notes, folders and more with a single command. Advanced search options allows you to include and exclude specific information and pinpoint exactly the information that you want to find within a group of database records.

### ASSIGN DOCUMENTS TO ISSUES, CATEGORIES AND FOLDERS, AND APPLY REDACTIONS

Create and assign custom issues and categories for organizing evidence; allocate documents to specific folders; and perform online redactions that can be burned-in during production.

### DOCUMENT COLLECTIONS

Organize and manage all scanned image files and summary information—and control access to them. Host imaged documents, OCR, native files and more.

Now you can manage discovery through a centralized Web-based repository.

- Highly secure for your sensitive data
- Flexible for creating and storing multiple document collections and production sets
- Fine-grained access control
- Intuitive search tools to conduct sophisticated queries across your entire case
- Web-enabled to work easily with distributed teams and outside parties, 24/7

## CT Summation CaseVantage

### E-MAIL AND ELECTRONIC DOCUMENTS

Upload, search and cull eDiscovery and e-mail, including attachments. Review documents, produce them in their native formats, or convert them to image format for production.

### CASE MANAGEMENT

Use Case Calendar to manage events and alerts, including the option to send e-mail notification to selected users.

### PRODUCTION SETS

Create multiple online production sets combining paper-based documents, electronic documents and e-mail messages. Burn-in Bates stamps (with original or new numbers), redactions, endorsements and stamps. Create automatic production tracking history.

### CONTROL CONTENT

User login controls access to transcript and document collections while group-based permissions control access to annotations, folders, issues and categories.

### SIMPLE ADMINISTRATION

Set up a new client in minutes with simple screens to define client properties and preferences including key contacts, permissions, contract specific billing information and client specific data storage locations. Intuitive data mapping feature allows you to import data from many sources. Definable base levels and volume price-points allow you to automatically generate billing metrics when ever you need them.

### RECOMMENDED MINIMUM REQUIREMENTS:

- Internet Explorer 6 or higher
- High speed internet connection
- Windows 2000, XP or higher
- Java installed  
(available from [www.java.com](http://www.java.com))
- Ghz processor with 1GB of RAM or higher
- Adobe Reader to view .PDF files

### Strict Security. Robust Technology.

Designed with the strictest security measures available, CT Summation CaseVantage is built on technology that meets the Department of Defense C-2 security rating and includes industry-standard SSL 128-bit encryption. Stringent firewall technology and flexible permission structures make it possible for you to control access to information.
